

Electronic Medical Records

Simplify screening.
Reduce patient and site burden.

AutoCruitment's EMR Capture and Intelligence simplifies the screening process and removes the burden of capturing consent, confirming patient identity, retrieving and organizing medical records, and reviewing patients for trial eligibility.

The success of direct to patient recruitment strategies depends on effectively qualifying eligible participants. Relying on potential patients to accurately report their history is one of the biggest challenges of this recruitment strategy.

EMR Capture and Intelligence allows us to tap into health networks so we can access medical records on the patients' behalf. AutoCruitment is able to better qualify patients by capturing, aggregating, and structuring medical record data and documents using AI powered technology.

AutoCruitment

I'm the patient signing for myself.
 I'm the Legal Representative signing for the patient.

As a participant in the AutoCruitment LLC ("AutoCruitment") services, when we identify potential studies for which you may be eligible, you can share your medical records to help the identified research sites determine your eligibility. If you are willing to allow access to your protected health information for study matching and qualification purposes, please carefully review the below details and complete this form.

In accordance with the HIPAA patient right of access, this HIPAA authorization is made by or on behalf of:

Participant Name:	Terisa Hansen
Date of Birth:	10/11/1993
Email Address:	kwovyr256@seonaps.com

By executing this release, the above named participant authorizes Carequality, CommonWell Health Alliance, eHealth Exchange, laboratories, and/or any other of my treating providers to disclose my protected health information to AutoCruitment or its agents so that AutoCruitment or its agents may use and disclose my information as necessary to provide the AutoCruitment services and qualify and match the participant for potential research studies throughout your engagement of AutoCruitment for clinical trial matching services.

By signing below, you indicate your agreement to release ALL of your medical records, including but not limited to the following types of records:

- Outpatient Medical Records
- Inpatient Medical Records
- Radiology Records
- Laboratory / Pathology Records
- Pharmacy Records
- Next Generation Sequencing (NGS) Test Results
- Claims or Remitted Billing Statements
- Patient ↔ Provider Communication Records

To the extent applicable, the undersigned acknowledges that the medical records may include and hereby consents to the disclosure of sensitive records that may include information related to HIV / AIDS testing or HIV status, sex or reproductive health information, mental health information, and/or substance abuse information.

I, the undersigned, also understand and agree that:

- This authorization is voluntary. I have a choice to refuse to sign this authorization.
- I, the participant, will receive a copy of this authorization after it has been signed.
- My ability to obtain treatment, receive payment, or eligibility for benefits from other health care providers is not conditioned on signing this authorization, unless allowed by law. However, I understand that if I do not sign this authorization, AutoCruitment will be unable to use my medical record to further the matching and qualification process for my eligibility in potential research studies.
- I may revoke this authorization in writing at any time but that once my protected health information has been used or disclosed in reliance on this authorization, the Provider nor AutoCruitment or its agents can retrieve copies of the records or prevent re-disclosure by others.
- Once my protected health information is released to third parties, it could be redisclosed and may no longer be protected by HIPAA or other privacy laws.

UNLOCK EFFICIENCY

REDUCE PATIENT BURDEN BY SIMPLIFYING THE SCREENING PROCESS

After passing the online screener, potential patients will be prompted to provide eConsent to access their Electronic Medical Records.
